MOBILE SOLUTIONS

With the ongoing growth of mobile and remote workers and the increasing trend of "bring your own device," more and more workers are integrating their smartphones and tablets into the office workflow process. Whether within an office or at a remote location, these workers often require document access and printing capabilities while on the move. Since workers are accustomed to ease of access within the office, they can become frustrated when company printers and MFPs are incapable of supporting their mobile printing or scanning needs.

COMMON WORKFLOWS AND APPLICATIONS

Think about document access and output needs on mobile devices in environments where staff members are constantly moving through the building or visiting multiple locations.

LARGE, CAMPUS-STYLE ENVIRONMENT

Workers and visitors are moving throughout the environment, traveling from meeting to meeting, requiring access to view and print documents from their mobile devices.

LEGAL OFFICE

Compliance is a requirement in a legal environment. Document and file access from mobile devices must be tracked and accounted for, as legal documents contain confidential information, and the transaction may need to be billed back. Scanned documents must also be accessed and tracked via mobile devices.

MEDICAL OR GOVERNMENT OFFICE

Organizations that need to protect sensitive information and documents and must adhere to personally identifiable information (PII) laws can struggle to utilize mobile devices in a compliant manner. Thus, secure access and tracking capabilities are required.

COMPANIES WITH REMOTE WORKERS WHO VISIT THE MAIN OFFICE OCCASIONALLY

Remote workers require access to documents and files while offsite; they need to print, scan, and share their documents while visiting the main office.

MOBILE SOLUTIONS FROM CANON

Strategic investments in mobile technology help give employees access to information where and when they need it. This also helps to ensure that companies retain the ability to keep information secure and to track and charge back associated costs allowing an organization to leverage the solution that best aligns with its company's internal policies and compliance regulations. Mobile Solutions from Canon provide various levels of convenience and control. The uniqueness of Mobile Solutions from Canon is the ability to scale and fit within each customer environment, depending on their needs.

PEER-TO-PEER

CANON MOBILE PRINTING

- Free app for compatible iOS and Android smartphones and tablets
- Direct printing from imageRUNNER ADVANCE MFPs, imageRUNNER MFPs, imageRUNNER LBPs, and imageCLASS MFPs
